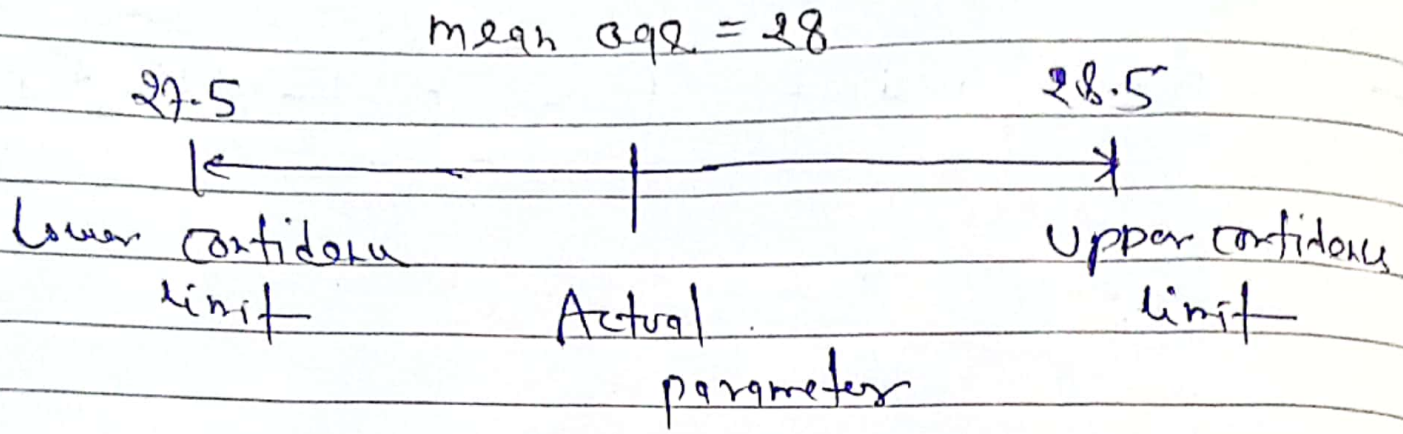
DATE:

## Confidence Interval :



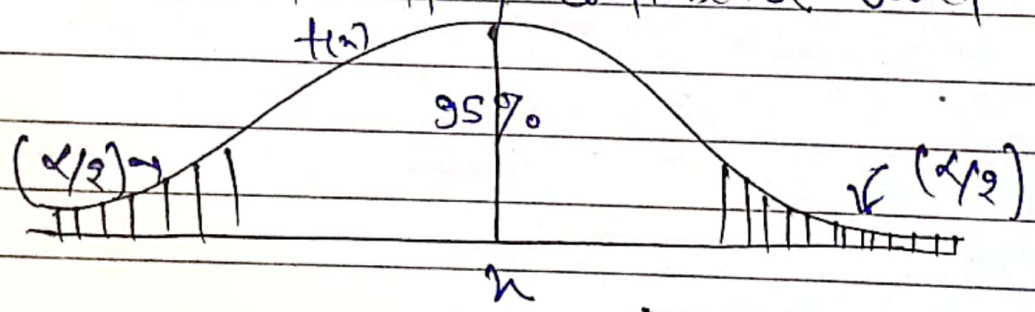
## C.I :

= point estimate ± margin of error

margin of error = $z_c$ * Standard error of a particular statistic

$z_c$ : 0.9, 0.95, 0.99 - -

$z_c$ : Critical value / confidence level



C.I for a mean = $\boxed{\bar{x} \pm z_{\alpha/2}\left(\frac{s}{\sqrt{n}}\right)}$

Scanned with OKEN Scanner

$\alpha$ : significance value = 0.05

$(1-\alpha)$ = confidence value / Level
