PART-II

PAGE NO.:
DATE:

Data

- Type 1 → Structured (Table, spreadsheet Relational D.B.)
- Type 2 → Unstructured (multimedia content (image video, audio) text, web page)
- Type 3

- Type 2 :

  - Cross sectional (Data collected at a single point of time) ie: marks, survey.)
  - Time series
    ↓
    (Time Series data collected over a sequence of time interval)
    ie: Stock prices, monthly sales data etc.)

Type-3 :

- [Univariate] (single variable)
- [Multivariate] (Two or more than two variables)

PAGE NO.:
DATE:

Types of variable:

- Nominal (Gender [male | Female], colors)
- Ordinal (Education Level (10th, 11th, 12th), Rating)
- Numerical (Income, Age, price etc)
- Categorical (Types of cars, product categories)
- Interval (Temperature, IQ scores)
- Ratio (Height, weight, age)

  ↳ in this if difference is zero(0) still hold meaning that is diff. b/w Interval & Ratio.

Note I:
Numerical data can be
- Interval
- Ratio

Note-II: Categorical data can be
- Nominal
- ordinal.
