PART-8

PAGE NO.:
DATE:

(i) Frequency :-

it is no. of times, a value or data occurs.

→ categorical variables.
→ frequency distribution table

Ex- {1, 3, 3, 2, 4, 1, 2, 2, 1, 2, 3, 5, 4, 1, 2, 1, 3, 1, 4, 1}

Data values	Frequency	R.F
1	7	7/20 =
2	5	5/20 =
3	4	4/20
4	3	3/20
5	1	1/20
	20	

(ii) Relative frequency :-

percentage or portion of the data value present in complete dataset

$$R.F = \frac{F}{\text{Total no. of observation}} \times 100$$

PAGE NO.:
DATE:

(#) Cumulative frequency :

Exa :- Customer complaints at a company.

Shipping Delay : 15 complaints
product Quality : 10 "
Billing issue : 8 complaints
Return : 12 "

⊙ ~~Shipping Delay~~ data value	Frequency	cumulative frequency
Shipping Delay	15	$\boxed{15}$
product Quality	10	$15+10=\boxed{25}$
Billing issue	8	$25+8=\boxed{33}$
Return	12	$33+12=\boxed{45}$
