DAY-19

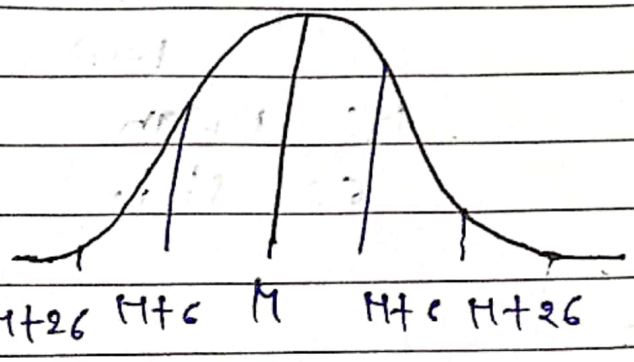
PAGE NO.:
DATE:

(#) Normal Distribution :-

it has probability Density Funth (PDF) with continous variable

$$\boxed{PDF = \frac{1}{\sigma\sqrt{2\pi}} e^{-1/2\left(\frac{x-\mu}{\sigma}\right)^2}}$$

- Mean = μ
- Variance = σ^2
- std = σ



Standard Normal Distribution (Z distribut) :-

- mean = 0
- std = 1
- Normal distri → standard Normal distri
  ↳ Z scores
